Summary

AI & Automation Developer with expertise in LLMs, RAG, and cloud-deployed AI systems, delivering up to 70% efficiency gains through intelligent automation. Experienced in Python, Machine Learning, NLP, Deep Learning, and API-based integrations with hands-on project deployment. Campus Ambassador for Cognizance (IIT Roorkee) and Google Student Ambassador, driving 25–40% growth in technical engagement across 300+ students.

Experience

Campus Ambassador Jan2026-Mar2026
Cognizance, IIT Roorkee (Annual Technical Fest) *Telangana, India*

- Drove 25–30% increase in event registrations by executing targeted outreach campaigns via WhatsApp, LinkedIn, and in-person sessions, reaching 300+ students across departments.
- Coordinated with 5+ student clubs and peer leaders to build a cross-departmental campus tech community, strengthening participation and communication pipelines.
- Served as primary liaison between the Cognizance core team and student body, ensuring timely updates, smooth registration support, and seamless national ambassador collaboration.

Google Student Ambassador Aug2025-Dec2025
Google Student Ambassadors India *India*

- Achieved 25–40% higher engagement over prior student-led events by organizing workshops, hackathons, and tech talks on Google Cloud, AI/ML, Android, and Web Technologies for 300+ students.
- Promoted Google certifications and learning paths across Cloud, AI/ML, Android, and Developer Tools, measurably increasing student enrollment in global programs.
- Onboarded students to Google's global developer ecosystem, building a sustainable peer-learning community and acting as the bridge between Google initiatives and the campus.

Projects

IntelliHire Agent *Python, LLMs, RAG, ML*

- Built an AI-driven hiring assistant using Python and LLM-based workflows, automating candidate screening and reducing manual evaluation effort by up to 70%.
- Implemented RAG pipelines to enhance contextual reasoning and output accuracy, enabling intelligent document-grounded Q&A across resumes and job descriptions.
- Optimized system performance through rigorous testing and evaluation, ensuring production-ready reliability and real-world deployment readiness.

Stellar Python Game *Python, Flask, API Integration*

- Designed and developed a fully functional, scalable game application in Python, implementing real-time data handling, API integration, and interactive user logic.
- Applied performance optimization techniques to improve system responsiveness and reliability, achieving measurable reduction in latency under varied load conditions.
- Validated application accuracy and usability through end-to-end testing, delivering a polished and real-world-ready product.

Education

ACE Engineering College, Hyderabad 2023 – 2027
Bachelor of Technology, Artificial Intelligence & Data Science GPA: 8.2 / 10

Telangana State Board 2021 – 2023
Class 12th (MPC) Grade: A

St. Joseph's High School, Sangareddy 2015 – 2021
Class 10th Grade: A

Technical Skills

Programming Languages: C, Python, Java **AI/ML:** LLMs, NLP, RAG, PyTorch, Machine Learning, Deep Learning

Tools & Frameworks: Flask, FastAPI, Pandas, NumPy, Git/GitHub

Cloud & Others: Google Cloud, AWS, Azure, REST APIs

Certifications: Oracle Cloud Infrastructure | Microsoft Azure AI Fundamentals | Data Analysis Using Python | Prompt Engineering For Everyone
